

Select CMS Platinum

Complete Cabin Control At Your Fingertips

Control and Manage: Full 1080p High-Definition Video Equipment
Cabin Lighting, Shades, Galley and More
Moving Map and Flight Information

Information and Entertainment At the Touch of a Button

Flight Display System's exclusive Cabin Management System, **Select CMS Platinum**, provides VIP customers with customizable controls for all information and entertainment needs. Powered by crystal-clear OLED buttons and touchscreen monitors, **Select CMS Platinum** is versatile enough to control any cabin from a six seat turboprop to a wide body airliner. Control lights and galley equipment with any Android tablet; watch Blu-ray movies; or use your Apple iPad, iPhone, or iPod to enjoy portable content in-flight.

Designed for High-Definition Video

You expect more, so **Select CMS** incorporates the very best High-Definition technology by design. Whether at work or play, enjoy your music, movies, games and more.

Customizable Look and Feel

Put your personal stamp on the appearance of your Cabin Management System. We offer user interface styles ranging from conservative to modern.

iPad App

Manage everything in your CMS with your iPad. Our new app offers the same control as our OLED and touchscreen modules. In addition, we offer mounts, docking stations and adapter cables for iPads, iPhones and iPods.

Simple, Yet Rugged Connectivity

The Controller Area Network Bus (CAN Bus 2.0B) is the backbone for the **Select CMS**. This architecture forms a reliable network of components that interact with one another without the complexity of the wired connections of old. This helps eliminate downtime from hardware changes.

Easy Upgrades

Keep up with the fast-paced changes in consumer electronics and minimize the financial impact of system redesigns. Our CAN Bus architecture eliminates the guesswork and keeps the focus on customization.

Worldwide Flight Display Moving Map

View real-time flight information and always keep track of where you are in the air. The information available at the touch of a button includes the flight's present position, altitude, destination, speed, time en route, and so much more. Each moving map can be pre-configured to your exact specifications.

24/7 Aircraft On-Ground Customer Support

Flight Display Systems understands the importance of staying on schedule. Our dedicated staff is available to provide system technical support, answer installation questions, or discuss anything else about the Cabin Management System.

Remote Troubleshooting

Remote Diagnostics Connection for the Select CMS Platinum provides an instant connection to Flight Display Systems' quick turn support using the Internet. This allows the flight crew to concentrate on flight operations.

Trusted by High Profile Clients Worldwide

Select CMS is installed on aircraft that provide services for Presidents, Prime Ministers, CEOs, and business jet customers from all over the world. Their trust in Flight Display Systems is evident by the testimonials received and the awards garnered from customer ratings for service and support.

Gulf Coast Aviation Houston, TX

I have really been impressed with Flight Display Systems. Their support during and after installation has been fantastic. We made some customizations for the owner which were extremely simple to do. It is a great experience to call and dial a number and you're talking to someone right away.
