

Wireless Access Point

Dimensional Drawing

Product Description

The Wireless Access Point (WAP) is a full-featured 802.11 a/b/g/n WiFi hotspot, with three antenna connections.

A single six-wire connection between the WAP and the APE provides control and data communication and power. This greatly simplifies installation and maintenance, and reduces wiring complexity and potential failure points.

Features

- Lowest weight
- Lowest cost
- Lowest power
- High reliability
- Compatible with multiple OS

Interfaces

- Single connection to APE
- Dual USB type "A" sockets for passenger connection

Specifications

- Power: 5VDC, 2A max (supplied by APE)
- Weight: 3.49 lbs.
- Dimensions: 317.5mm x 279.4mm x 63.63mm

Advantages

- Backs up wired connection
- Full Internet and email capability
- Utilizes Apps
- Compatible with Android and iOS
